

Royal Alloy

GP300SE Grand Prix Series

Product Range 2022/23

GP Series

The Royal Alloy GP series was really a breakthrough for us... And for the real retro scooting fraternity!

For the very first time in recent history the consumer can enjoy a truly authentic retro scooter that is made of steel!

In early 2021, the GP had a mid term facelift... So discreet was the facelift we challenge you to identify the many changes that we made in order to continuously improve an already fantastic product!

About us....

Royal Alloy are a British brand based in the North of England dedicated to the design, manufacture and marketing of totally unique 'classic' inspired scooters made to exacting standards utilising components from market leading suppliers.

Our lead designer studied Industrial Design Engineering at the Internationally acknowledged 'Central St Martins' in London and oversees the design development. Royal Alloy work with leading designers in Italy alongside our own internal team to enhance the International 'flair' of our brand.

Manufacturing takes place in ISO9001 accredited plants to exacting standards in order to meet many international homologation requirements.

Now we have all of the marketing hype covered, let us really talk about Royal Alloy!

We love scooters with petrol engines and especially those that ooze 'style' expressing the persona of the rider!

Do we ride scooters, yes! Indeed we ride all manners of two wheeled transport and enjoy them all - but in particular we enjoy the style and freedom of the scooter - especially the Royal Alloy scooter - check our mission to be not only environmentally friendly, essentially trendy, we are unique, we do not follow others, we make our own journeys so why not join us....

...Enjoy Life!
